

## Wildlife in your garden

In this activity you will learn how to record what you see in the garden, throughout the year.

### What do we need?

- The recording sheet – separate download.
- Clipboard and Pen/pencil
- Time - 15 to 30 minutes

Record the time and date that you see any of these birds or animals. There is space at the bottom of each table to record any other creatures you may see.

Record your finding throughout the year to see the difference between summer and winter in the garden.
